This document was published at a total cost of \$1.15 per copy for 4,250 copies, including all printings, by the Louisiana Department of Environmental Quality, P.O. Box 4301, Baton Rouge, LA 70821-4301, to provide the public with environmental information in accordance with La.R.S.30:2011, using standards for printing by state agencies established pursuant to La.R.S.43:31.

Printed on recycled paper. 

Notice to Readers: The Louisiana Environmental Update is published 4 times each year by the State of Louisiana, Department of Environmental Quality, to provide news and information of interest to the residents of Louisiana. Upon request, individuals or groups with 25 or more members will be placed on the mailing list of the Louisiana Environmental Update. If you wish to receive copies of this publication by mail, please contact the Communications Section at (225) 219-3960 or e-mail or write to the addresses provided above.

Message From the Secretary

Mike McDaniel, Secretary
Louisiana Department of
Environmental Quality

This year is rapidly slipping away. A lot has transpired at DEQ in the first 10 months of this year, including: the installation of a new management team; a legislative session; a legal contest with EPA on RFG in Baton Rouge; a very active ozone season; some reorganization; new budgets and strategic plans; several major conferences; and a number of new initiatives including ozone attainment, mercury initiative, small community compliance assistance, permitting efficiency, enhanced Capital Area emergency response, website update, new regional teleconferencing capabilities, and a new partnering effort with EPA Region 6. It has been a period of significant changes and new challenges for the agency and, altogether, we have done well.

Perhaps the highlight of the past few months was the celebration of DEQ's 20th anniversary. On Oct. 6, the agency celebrated 20 years of service in protecting and improving the quality of Louisiana's environment. It was a great event marked by retrospectives of agency history, accomplishments, former Secretaries, recognition of employees who have been with DEQ 20 years and remembrance of former employees who are no longer with us. We were honored to have Governor Blanco address our agency on its accomplishments of the past and promise of the future. In addition, the Governor's staff and Cabinet, plus a number of state legislators were in attendance. It was truly a wonderful and successful event for our Department.

At our 20th anniversary celebration Governor Blanco challenged DEQ with three major goals and I think it is important to call attention to them again here.

Clean Air

- Attain federal 1-hr and 8-hr ozone standards for the Baton Rouge area by 2007
- Achieve and maintain attainment with all federal National Ambient Air Quality Standards throughout the state.

Clean Water

- As of 2004, 310 water bodies were assessed as not meeting Louisiana's "fishable" use
 - By 2012, 77 (25%) of these are to be improved to the point of supporting this use
- As of 2004, 111 water bodies were assessed as not meeting Louisiana's "swimmable" use
 - By 2012, 28 (25%) of these are to be improved to the point of supporting this use
- LDEQ Clean Water Goals Implementation Plan to be completed by December 2005

Mercury

- Reduce public exposure risk for mercury
- Louisiana Statewide Mercury Risk Reduction Plan to be completed by December 2005
 - Assess sources of environmental mercury
 - Develop strategy(ies) to reduce public health risks associated with mercury

It was also announced at the 20th anniversary celebration that DEQ was issuing administrative orders to 16 facilities in the 5-parish Baton Rouge Ozone nonattainment area that emit highly reactive volatile organic compounds. These highly reactive compounds have been implicated by DEQ research as having contributed to most of the ozone exceedances experienced over the past couple of years. The orders require fence-line monitoring for HRVOCs at all 16 facilities and extensive internal audits for emissions sources at 6 facilities in East and West Baton Rouge Parishes. The purpose of the orders is to identify and reduce releases of HRVOCs before next summer's ozone season.

Additionally, DEQ air quality monitoring efforts this summer identified a problem in the north Baton Rouge area with releases of 1,3-butadiene, a toxic air pollutant regulated under both federal and state law. Four potential sources of the releases were called in to meet with DEQ on this matter.

On a closing note, I'd like to report that as of Nov. 1, DEQ pledges and contributions to the United Way Campaign totaled more than \$42,000. This is more than a 50 percent improvement over last year's total of \$27,000. This was made possible by the charity of our employees and the hard work of a large number of volunteers. We are proud for you and our organization. 

DEQ Secretary Mike
McDaniel discusses
the administrative
orders issued to 16
industrial facilities on
WRKF 89.3 FM with
host Karen Anderson.

OZONE

WORKING TO SOLVE THE PROBLEM

Governor Kathleen Babineaux Blanco took the occasion of DEQ's 20th anniversary celebration to announce that she directed Secretary Mike McDaniel to issue administrative orders to 16 industries in the five-parish nonattainment area for ozone. These orders will collect more information for developing an ozone control strategy that will be protective of the health of Louisiana citizens.

The nonattainment area has not met attainment for the EPA one-hour standard for the pollutant ozone and is classified as severe. Ozone exceedances for the summer of 2004 have made it impossible to achieve attainment by November 2005. This same area is required to meet the eight-hour standard for ozone by June 2007.

"Baton Rouge has struggled to comply with federal ozone standards and this has been an economic and physical burden on the area's residents and businesses," Governor Blanco said. "We hope that these monitoring efforts will lead to more effective control of these releases."

The failure to make attainment of these ozone standards could put into effect possible Clean Air Act penalty fees and the serious classification can have economic and health impacts on Louisiana.

After the summer of 2003, DEQ put into place a Highly Reactive Hydrocarbons work group to study the problem of exceedances and ozone spikes. Three years of research and findings by this specialized group indicated that HRVOC releases were associated with exceedances of the one and eight-hour standards. HRVOCs continue to be a problem.

Gov. Kathleen Babineaux Blanco answers questions from various members of the media following the announcement of the administrative orders. Gov. Blanco spoke during the 20th Anniversary ceremony at DEQ on Oct. 6, 2004.

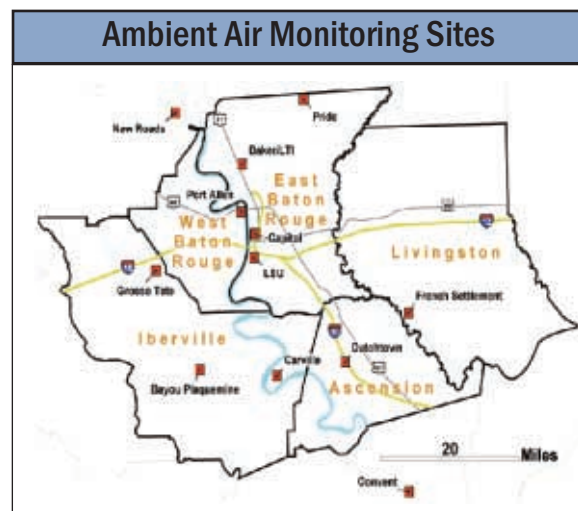

The administrative orders require the industries, which produce HRVOCs, to install a minimum of four air-monitoring stations near the fence line of the facility.

The monitors, which will be located at all compass points, will be equipped with a continuous total non-methane organic carbon analyzer for detecting volatile organic compound concentrations of more than 0.1 ppm. Each facility will be required to have one 10-meter meteorological tower in the predominant downwind direction from the center and one in the upwind direction of the facility. These requirements, along with others, should provide the information

needed to find a way to control the effect of VOCs on ozone exceedances in the nonattainment area.

These orders, the HRVOC workgroup, continued dialogue between the state and industry and continued community support should help DEQ develop a strategy to reach attainment for ozone. The entire state meets all other ambient air quality standards.

2004 Ozone Season					
PARISH	CITY	03/20	08/18	09/29	10/04
E. Baton Rouge	Baton Rouge/Capitol			130	
E. Baton Rouge	Baton Rouge/LSU			149	
E. Baton Rouge	Baker	142	141		
Iberville	Bayou Plaquemine				
Iberville	Carville			126	
W. Baton Rouge	Port Allen				149
Pointe Coupee	New Roads				

Above: The five-parish nonattainment area is monitored by various ambient monitoring stations. Left: During the 2004 Ozone Season, the five-parish nonattainment area had four ozone exceedances. An exceedance for the I-hour standard is over 124 ppb.

A Day in the Life of...

DEQ's Special Assistant to the Secretary

Bob Hannah, Special Assistant to DEQ Secretary Mike McDaniel, worked with environmental issues in the state long before DEQ became an official state agency in 1984.

On a daily basis, Bob wears many hats. Because of his broad based environmental knowledge, he is an important part of DEQ's environmental initiatives. He served as chairman of the Highly Reactive Hydrocarbons Workgroup and has been extensively involved with the Mercury Initiative. He is often called upon to make public appearances, talk with the media, and speak to industry officials and citizens about DEQ's position, goals and initiatives. Bob's career parallels and reflects the many changes in environmental policy and procedures in Louisiana.

Bob, who has a BS in Business Administration from Florida State University and a BS and MS in Biology from the University of West Florida, started his career addressing water quality issues and spent 25 years doing just that. For his first job, he monitored for pesticides in marine organisms for the U.S. Bureau of Commercial Fisheries, a predecessor to EPA. From there, Bob became responsible for running a water treatment plant as a plant chemist for Gulf Power Company.

Bob moved from Florida to Mississippi to take a job at with General Electric working at NASA. There he worked on a variety of projects including marine fisheries, behavior habits of turtles and porpoises and the effects of petroleum on marine organisms.

In 1976, Bob moved west once again and accepted a position in Louisiana with the Governor's Office of Science Technology and Environmental Policy. In this position, Bob worked with the technology that NASA was developing and how the technology could be used in state and local government to solve problems. He also worked with environmental policy concerning the development of offshore oil and gas. He was detailed to the National Oceanography Association where he responded to chemical and oil spills. He traveled around working on various Coast Guard clean up projects such as providing damage assessment of marine resources after the large Mexican oil spill

He worked in water pollution control at the Department of Natural Resources. He held the position of Program Manager for Water Quality and Assistant Administrator for Water Pollution Control after DEQ was formed from DNR, OSTEP and other agencies in 1984. When those positions were abolished, Bob moved from water to air quality.

At DEQ, Bob has held a number of senior

Bob Hannah, Special Assistant to DEQ Secretary

level positions. He was Program Manager for Air Analysis, Air Quality Administrator, and Administrator for the planning section of water and air as well as Deputy Secretary of the agency. His knowledge of air chemistry has been an integral part of formulating good air quality standards for Louisiana.

When Bob isn't working, he goes back to the water. He loves to fish in the coastal marshlands and hopes to travel to places like Costa Rica to enjoy his hobby. 🐟

Bob Hannah, Dr. Paul Templet and then State Senator Kip Holden answer questions from students involved in the Leadership LSU program.

MERCURY INITIATIVE TAKES OFF

Locating, handling and controlling mercury is a priority at DEQ. Secretary Mike McDaniel has convened a mercury work group to pull together agency resources and areas of expertise to address this growing problem.

DEQ took another step in its mercury initiative. A seminar held at DEQ in Sept., brought together people from industry, education, environmental groups, dental and medical areas, state and federal agencies and citizens to gain more information about mercury. The goal of the seminar was to inform those attending about the existence, dangers and safe handling of mercury in our environment. More than 100 attendees from diverse groups heard presentations on pertinent subjects concerning mercury. Topics were:

1. How mercury gets into the environment and why it is a nationwide problem
2. History and progress of the DEQ mercury program
3. Mercury in Air Emissions: Industrial sources

4. Water - Contribution from waste water and methylation; Impacts
5. Consumer products and recycling - Thermostats, thermometers and recycling of mercury products
6. Land - Manometers and remediation

These presentations, in power point format, can be accessed on the DEQ website at www.deq.louisiana.gov/surveillance/mercury under the heading Mercury in the Environment - Seminar Information. More information on Mercury and DEQ's role can also be found on the website.

The participants were asked to sign up for one of four mercury discussion groups:

1. Risk Communication
2. Consumer products/recycling
3. Industrial Processes
4. Medical/Dental uses

The groups are meeting and discussing the best way to address mercury in our environment.

What **NEVER** to do with a Mercury spill:

NEVER use a vacuum cleaner to clean up mercury. The vacuum will put mercury into the air and increase exposure. The vacuum will be contaminated and have to be discarded.

NEVER use a broom to clean up mercury. It will break the mercury into smaller droplets and spread them.

NEVER pour mercury down a drain. It may be lodged in the plumbing and cause future problems during plumbing repairs. If discharged, it can cause pollution of the septic tank or sewage treatment plant.

NEVER wash mercury-contaminated items in a washing machine. Mercury may contaminate the machine and/or pollute sewage.

NEVER walk around if your shoes might be contaminated with mercury. Contaminated clothing can also spread mercury.

HOW TO CLEAN UP A MERCURY SPILL LESS THAN OR EQUAL TO THE AMOUNT IN A THERMOMETER:

CHECK LIST of clean-up items:

- D 4 to 5 ziploc-type bags
- D trash bags (2 to 6 mm thick)
- D rubber or latex gloves
- D paper towels
- D cardboard or squeegee
- D eyedropper
- D duct tape, or shaving cream
- D small paint brush
- D flashlight
- D powdered sulfur (optional)

Mercury can be cleaned up easily from the following surfaces: wood, linoleum, tile and any other like surfaces.

If a spill occurs on carpet, curtains, upholstery or other like surfaces, these contaminated items should be thrown away in accordance with the disposal means outlined below. Only cut and remove the affected portion of the contaminated carpet for disposal.

STEP-BY-STEP INSTRUCTIONS FOR SMALL SPILL CLEAN-UP:

1. Remove everyone from the spill area and shut door of impacted area. Evacuate pregnant women and children first.
2. Turn off the ventilation system.
3. Remove all jewelry as mercury can be absorbed by silver and gold. Contaminated jewelry should not be worn and should be stored for disposal or taken to a trained jeweler for proper decontamination.
4. Put on rubber or latex gloves.
5. If there are any broken pieces of glass or sharp objects, pick them up with care. Wrap all broken objects in a paper towel and place in a zip lock bag. Secure the bag and label it as directed by your local health or fire department.
6. Locate visible mercury beads. Use a squeegee or cardboard to gather mercury beads. Use sweeping motions to keep mercury from becoming uncontrollable. Mercury can move surprising distances on hard-flat surfaces, so be sure to inspect the entire room when "searching."
7. Use the eyedropper to collect the s mercury beads. Slowly and carefully squeeze mercury onto a damp paper towel. Place the paper towel in a zip lock bag and secure. Make sure to label the bag as directed by your local health or fire department.
8. After you remove larger beads, put shaving cream on top of small paint brush and gently "dot" the affected area to pick up smaller hard-to-see beads. Alternatively, use duct tape to collect smaller hard-to-see beads. Place the paint brush or duct tape in a zip lock bag and secure. Make sure to label the bag as directed by your local health or fire department.
9. OPTIONAL STEP: It is OPTIONAL to use commercially available powdered sulfur to absorb the beads that are too small to see. Commercialized sulfur may be supplied as mercury vapor absorbent in mercury spill kits, which can be purchased from laboratory, chemical supply and hazardous materials response supply manufacturers.
10. Place all materials used with the cleanup, including gloves, in a trash bag. Place all mercury beads and objects into the trash bag. Secure trash bag and label it as directed by your local health or fire department.
11. Contact your local health department, municipal waste authority or your local fire department for proper disposal in accordance with local, state and federal laws.
12. Remember to keep the area well-ventilated to the outside (i.e., windows open and fans running) for at least 24 hours after your successful cleanup. Continue to keep pets and children out of cleanup area. If sickness occurs, seek medical attention immediately.

Ocean Commotion, sponsored by Louisiana Sea Grant, drew school kids of all ages to the Pete Maravich Assembly Center for a first hand look at many interesting exhibits. DEQ had an Environmental Jeopardy booth where kids answered questions about mercury, DEQ manned other booths concerning protecting drinking water, how rivers actually flow and litter reduction.

Leslie Garcia of the recycling section loads some of the 204 phone books that DEQ staff picked up from the Office of Community Services. Recycling staff took the phone books, along with 676 books collected at DEQ, to BFI recyclers.

Dr. Judy Schuerman and Teresa Edwards, of DEQ, demonstrate experiments to 6th grade students from the Ascension and Iberville Parish schools at the 2004 Chem Friends Expo at the Gonzales Civic Center. The event allows students to see chemistry in action.

Pam Kimball of DEQ helps sign up high school students to participate in the Beach Sweep, a component of the Keep Louisiana Beautiful campaign. Volunteers clean up inland and coastal waterways.

in the Move

Volunteers from the DEQ Southeast Regional Office in New Orleans set up and manned a booth at the Wooden Boat Festival in Madisonville. Great weather contributed to large crowds and lots of people visited the booth to get information about environmental issues.

Members of the recycling section and the Small Business Assistance Group set up booths at the Business Expo held at the Baton Rouge River Center. They distributed information on mercury, air quality, environmental issues and how DEQ can help small businesses through the permitting process.

At a meeting at Westlake, DEQ staff, including Sec. Mike McDaniel, the Lake Charles Mayor Raney Roach and Westlake Officials signed the signing of the cooperative agreement between DEQ and Westlake Polymers, L.P. Westlake has joined the cooperative agreement that will lead to an evaluation of cleanup options for the Bayou d'Inde Site.

DEQ volunteers Kathleen Duggan and Otis Randle of the Northwest Regional Office checked in the vehicles and directed them to the proper drop off place at the Household Hazardous Waste Collection Day held at the State Fair Grounds in Shreveport. During the September event, more than 400 residents took advantage of the opportunity to drop off old paint and other household hazardous waste. NWRO volunteers also manned a booth and handed out environmental information at the DHH Health Fair.

Jeff Jackson of the Acadiana Regional Office shows science teachers the water quality station used for Envirothon. Envirothon is a competition that includes both in-class curriculum and hands on experience on current environmental issues. DEQ exhibited at the Louisiana Science Teacher's Conference in Lafayette and did a presentation on DEQ involvement with the Envirothon. Science teachers from all over the state attended.

Commemorating 20

More than 500 people attended the department's 20th anniversary celebration held in DEQ's conference center on Oct. 6. Gov. Kathleen Babineaux Blanco was a special guest for the event. She told former DEQ Secretaries, cabinet members, other guests and employees how much she appreciates what DEQ staff contributes to the state. Gov. Blanco also laid out the important parts of the environmental mission of her administration. The three major goals outlined were for clean air, clean water and the reduction of mercury in Louisiana's waters and environment.

DEQ Deputy Secretary Karen Gautreaux and Assistant Secretary of Services Chuck Brown served as Masters of Ceremony. Secretary Mike McDaniel began with a brief summary of some notable events during DEQ's history. Assistant Secretary of Compliance, Hal Leggett, presented the history of DEQ and Wilbert Jordan, Assistant Secretary of Assessment saluted 20 year employees. Former DEQ Secretaries in attendance were introduced by Undersecretary Cy Buchert.

Several DEQ Staffers acted out events

in the daily activities of many DEQ employees. There were skits demonstrating how the public can call DEQ's single point of contact number and get help or lodge a complaint. Other skits showed the permitting and enforcement processes and public outreach programs such as the Drinking Water Protection Program and Household Hazardous Materials Day.

The celebration ended with a standing ovation after the DEQ chorus sang the state environmental song – "The Gifts of the Earth."

- DEQ has increased its ambient water monitoring sites from just over 100 in 1984, to more than 600 in 2004.
- Since 1991, the releases of toxic substances into Louisiana air has been reduced about 43 percent from more than 140 million pounds to just under 60 million.
- Louisiana is a national leader in the cleanup of superfund sites. More than 65 percent of our sites have been completely remediated.
- Since its inception, the DEQ waste tire program has cleaned up over 5 1/2 million waste tires and tire piles in Louisiana.
- Louisiana's ambient air quality standards are more stringent and comprehensive than 47 other states.
- Louisiana's air quality has improved over the last 20 years. In 1984, there were 20 ozone nonattainment parishes and now Louisiana has one, five-parish nonattainment area. The entire state meets all other ambient air quality standards.
- DEQ has virtually eliminated the 850 open dumping sites that existed in Louisiana in 1984.
- Louisiana was the first state in the nation to adopt rules for the control of naturally occurring radioactive materials. The standards developed are being used throughout the country. The Nuclear Regulatory Commission gave the DEQ radiation protection program the highest possible rating.

DEQ Employee Service Awards

Gary Aydele, Teri Lanoue and Thomas Griggs each receive a 30-year service award from Secretary Mike McDaniel.

Four DEQ employees received a 30 year service award during a departmental staff meeting held in the afternoon of October 6; Gary Aydele, Archie "Burns" Doss, Thomas Griggs and Teri Lanoue. The 2004 Employee Service Awards were presented to 139 employees of the department. Cy Buchert, Undersecretary, announced each award recipient who came forward to accept congratulations and their award from Secretary Mike McDaniel. The award included a certificate denoting the

years of service to the state of Louisiana for five, ten, fifteen, twenty, twenty-five and thirty years, along with associated pin.

This award ceremony is held every year in the Fall for those employees who have gained their eligibility status in five-year increments from July 1 of the previous year to June 30 of the current year.

Congratulations to all service award recipients for 2004.

In September, DEQ celebrated a successful voluntary clean-up effort in Abbeville.

The Roy Young Inc. site was cleaned up using innovative methods and several people were recognized with plaques and certificates. The site was once used to clean trucks and contained oily wastes and wash water in several surface impoundments and above-ground storage tanks.

Young, with assistance from DEQ and others, sold a portion of the family's property that was not contaminated and used the money to finance the cleanup of the site as part of DEQ's Voluntary Remediation Program, which is a brownsfield redevelopment tool. The sold portion is now part of the Shoppes @ Abbeville retail outlet and the newly clean property is expected to be used for retail development.

Eddie Young received a plaque for his role in the cleanup. DEQ's Keith Horn was recognized as team leader for the cleanup efforts at the site. Vicki Hadwin received a certificate for support staff and Lou Buatt was the attorney supervisor. Marcus Guidry, consultant, and Owen Burlet, representing Hermitage Properties/Shoe Sept., also received plaques.

Eddie Young, Keith Horne, DEQ, Marcus Guidry, consultant and Owen Bourlet, Hermitage L.P./Shoe Department display their recognition plaques.

Sierra Club Roundtable Discussion

The Sierra Club sponsored a roundtable discussion on The Environment and The Economy - A Forum on our Future. The discussion was held at Louisiana Public Broadcasting with Karen Henderson, a Baton Rouge reporter, as moderator. Secretary Mike McDaniel, the late Red Bourg, President of the AFL-CIO and Dr. Paul Templet, LSU Department of Environmental Studies were the panelists.
